

FOOD HANDLER'S FOAM PRODUCT INFORMATION

CLEANSING

STOKO® REFRESH 4 in 1 Food Handler's foam is a fragrance free and dye free formulation for the special needs of food processing and handling facilities. Contains a cleanser and antimicrobial agent in one. Kills 99.9% of food-borne germs that can cause cross contamination including E.coli. Meets former E2 rating requirements.

Description

STOKO® REFRESH 4 in 1 Food Handler's Wash has great lather, is gentle to the skin even with everyday use and contains no dyes or fragrances. Each refill features the Hygeni-Lok® system which ensures a safe, clean, hygienic product, free from germs and bacteria. The bottle and pump are completely replaced with every changeout providing a fresh new system each time. The high performance patented foaming pump provides a full bodied foam with no clogging. The Food Handlers' formula with 0.5% Triclosan removes and kills common germs and bacteria.

The efficiency of the foaming pump helps to give a cost savings. Each activation of the pump releases 0.4ml of soap compared to 1-1.5ml in conventional systems. This reduction can amount to end-user savings of over 40%.

SKU#34974 1000ml
Provides up to 2,500 pumps per 1000ml refill.

Directions for Use

- Pump foam in palm of hand, add a little water and wash thoroughly.
- Rinse thoroughly with potable water after washing.

Skin Compatibility

Under conditions of a Human Patch Test, no evidence of primary irritation or allergic hypersensitivity was found. No negative reactions occurred after 24, 48 and 72 hours.

Feature	Benefit
Contains .5% Triclosan	Kills common germs and bacteria

STOKO® REFRESH Food Handler's Foam Wash has also been reviewed and tested by NSF (National Sanitation Foundation) for the Chlorine Equivalency Test by AOAC 955.16 and found to pass this test making it suitable for use as a hand wash and sanitizer in food processing.

STOKO® REFRESH Food Handler's Foam Wash is registered with NSF and included in their published list of approved products for use in food processing in direct contact with food.

First Aid

For external use only. If STOKO REFRESH® Food Handler's Foam accidentally enters the eyes, flush immediately with lukewarm water and contact a physician. Discontinue use if irritation or redness develops. If condition persists for more than 72 hours, consult a physician. Keep out of reach of children. If swallowed, call your physician.

Storage Information

STOKO REFRESH® Food Handler's Foam can be stored in a closed container for 24 months at room temperature.

All STOKO® Skin Care products are tested for stability at temperatures between 23°F and 104°F. When tested at temperatures below 41°F and above 86°F, the products begin to fluctuate in viscosity. Hand cleaners may become cloudy or freeze partially at temperatures of 32°F or below, however, they are usable after thawing. For optimum dispensing performance, keep from freezing temperatures.

Additional Information

Occupational skin irritation, frequent washing or harsh climates can lead to dry, rough and chapped skin. This condition can result in irritation/rupture of the outer layer of the skin which impairs its natural protective function. To help regenerate damaged tissue after work, the skin should be regularly treated with Stoko Lotion, Stokolan or Stoko SkinRelief. In doing so, the skin is replenished with moisture, lipids and hydrophilic nutrients. People who already have extremely rough or very dry skin are advised to use a before-work, barrier-like cream with high oil content. Contact STOKO Skin Care or its appointed distributors for advice on selecting the appropriate products.
